## Installing the application

Once you have the application in hand it contains a .apk file more precisely it is called “MyExpenseTracker.apk”. By clicking on this file the android intaller will begin the process of installing the applications. There are no special requirements of the application so no permissions will have to be provide by the user.

## Starting the application

Once the application is installed on the phone a icon will get created in the menu of the phone just click on this icon and the app will start.

## Registering

The application does not need any kind of registration.

## Gerting Started

This screen will appear once the application is started. This is the Dasboard of the application.

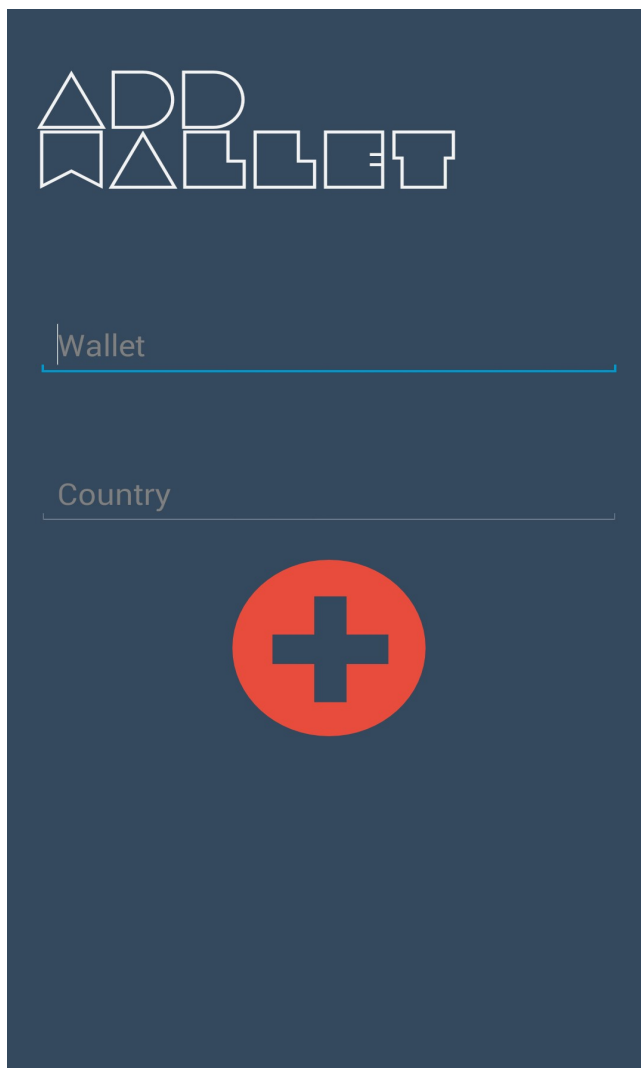

This screen holds three options

1. Add wallet represented by the “+” sign.
2. View created wallets represented by the hamburger sign “≡”
3. Update wallet represented by the circular arrow.

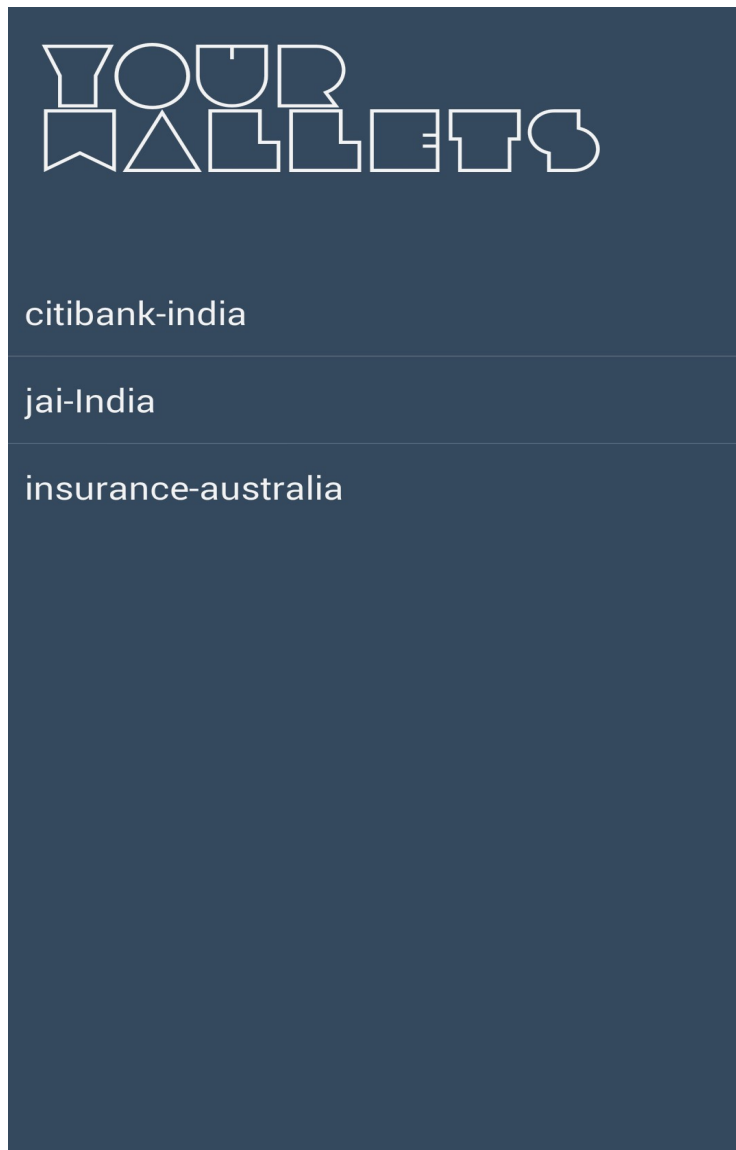

### Adding a wallet

Here, too you need to enter the details the fields given the fields are the wallet name and the name country that the wallet belongs to. Once these details are filled and the “+” is clicked on the wallet will be created for the user.

A screenshot of a mobile application screen with a dark blue background. At the top, the words "ADD WALLET" are written in a large, white, outlined font. Below this, there are two input fields. The first field is labeled "Wallet" in a light gray font and has a blue underline. The second field is labeled "Country" in a light gray font and has a light gray underline. At the bottom center of the screen, there is a large red circle containing a white plus sign (+).

## View Wallet

Once the wallet has been created it can be view in the view wallet section of the application which can be got to by clicking on thr hamburger sign “=” on the applications dash board.

The created wallets will be display in the form of lists in reverse cronological order.

## Expenses

Once we click on any of the wallets that were viewing in the view wallet screen. It will lead us to the expenses page now the idea is that your expenses go inside a certain wallet that you choose. This keeps each wallet that was created and the expenses it holds logically and visually separated from each other.

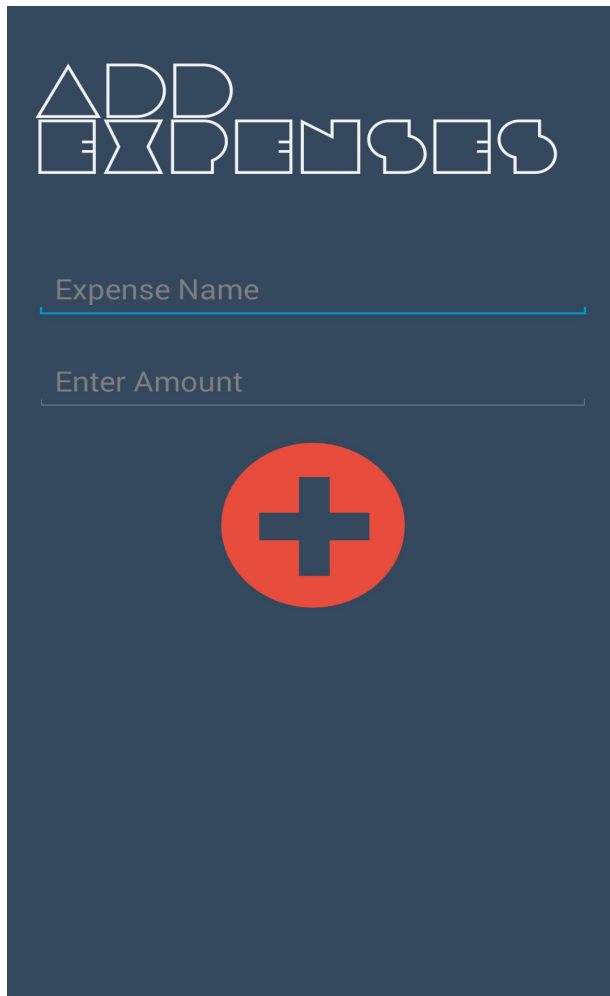

The header of this screen is the name of the wallet that we had created.

Now this page gives us two more options.

1. Add expenses by clicking in the “+” button
2. View expenses by clicking on the “=” button

## Add Expenses

This screen enables us to add expenses to the wallets that we had chosen. we have to fill as input the name of the expense and the amount that was required by that expense.

A dark blue mobile app screen titled "ADD EXPENSES" in a white, stylized, outlined font. Below the title are two input fields: "Expense Name" and "Enter Amount", both with light blue underlines. At the bottom center is a large red circle containing a white plus sign (+).

After filling the required fields and clicking the “+” button the expense gets created in the wallet.

## View Expenses

The expenses that were added to the wallet can be view from the main expenses screen by clicking on the hamburger icon “≡” .

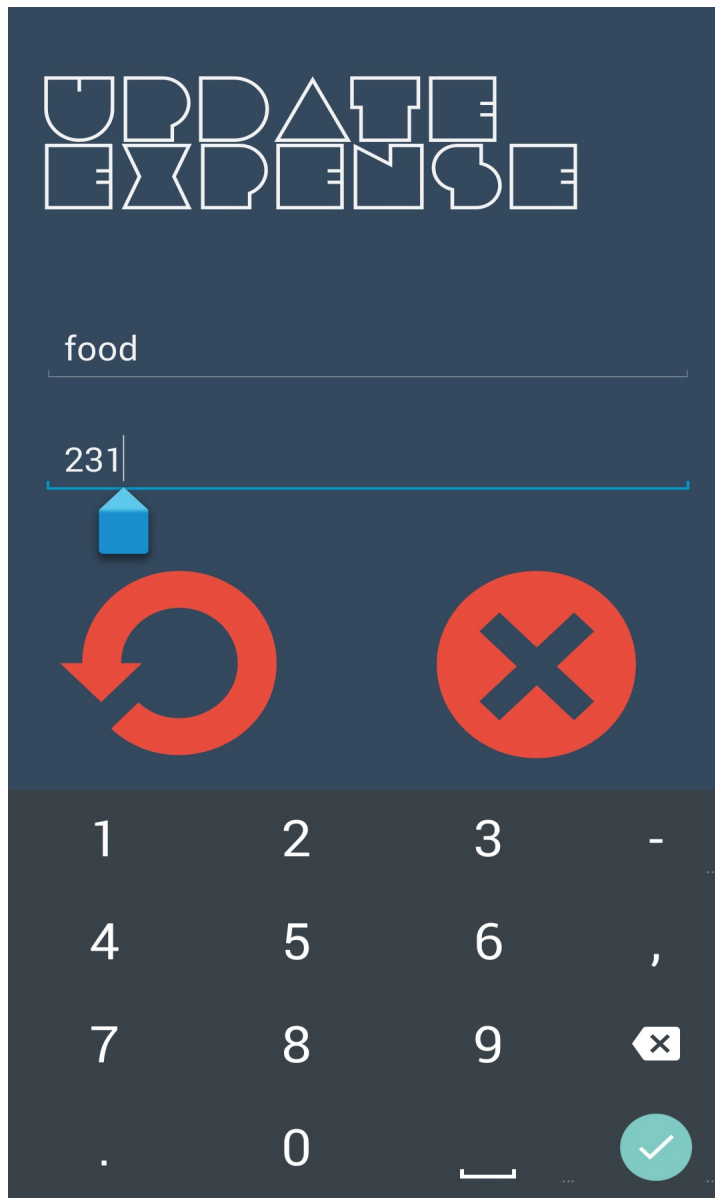

## YOUR EXPENSES

7	ppf	231
8	xjdhsh	80
10	dgj	5266

The expenses are displayed in the form of a list and they each individually can be clicked to update the expenses.

## Update Expenses

By clicking on one of the items in the view expense screen you will be directed to the update expenses screen. Here we can update that expense.

The image shows a mobile app screen titled "UPDATE EXPENSE" in a stylized, outlined font. Below the title, there are two input fields. The first field contains the text "food". The second field contains the number "231" and has a blue cursor icon positioned below it. Below the input fields, there are two large red circular icons: a circular arrow on the left and a crossed-out "X" on the right. At the bottom of the screen is a dark grey numeric keypad with buttons for digits 1-9, 0, a decimal point, a minus sign, a comma, a backspace icon (an arrow pointing left with an 'x'), and a green checkmark icon.

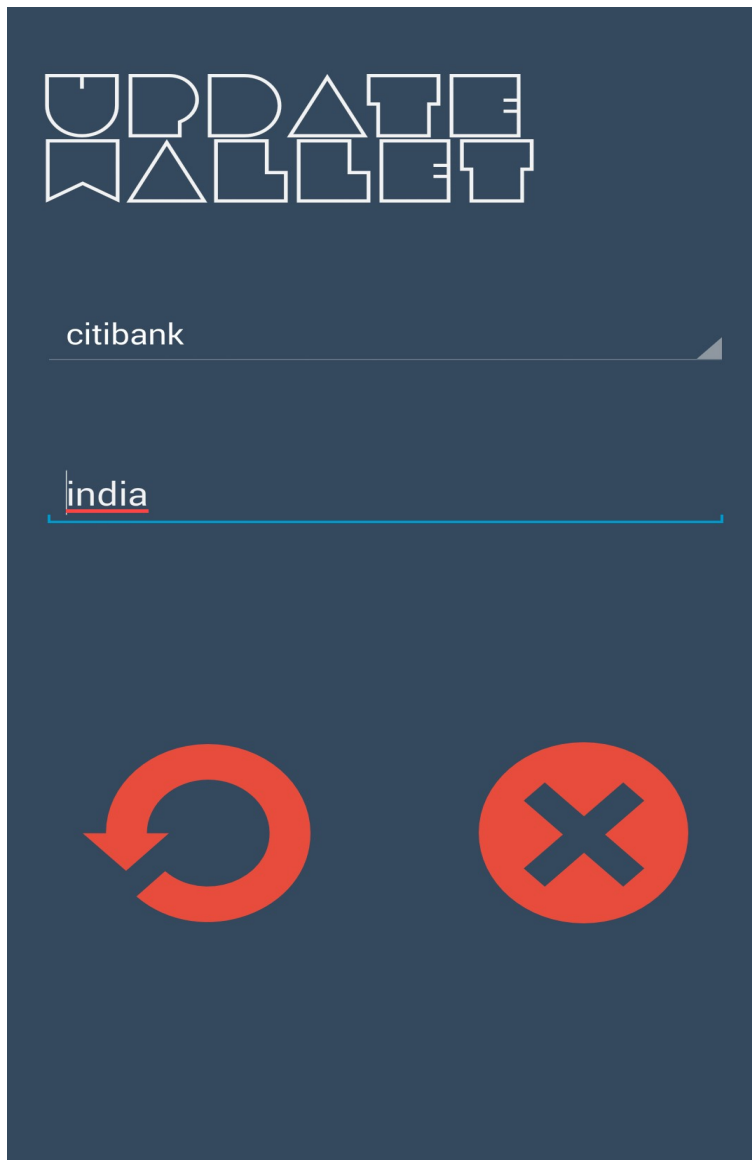

Two operations can be performed on the screen.

1. The expense can be completely deleted. By clicking on the "X" icon
2. The name and amount of the expense can be updated by filling in the required fields and clicking on the circular arrow.

## Update Wallet

This screen can be got to by clicking the circular arrow on the application dashboard. This is the update wallet screen and can be used to either completely delete the wallet or update the name nad country of the wallet.

A mockup of the 'Update Wallet' screen. At the top, the title 'UPDATE WALLET' is displayed in a white, outlined, blocky font. Below the title, there are two input fields. The first field contains the text 'citibank' and has a small grey triangle on its right side. The second field contains the text 'india' and has a red underline. At the bottom of the screen, there are two large red circular icons: a circular arrow pointing clockwise on the left, and a circle with a dark blue 'X' inside on the right.

UPDATE WALLET

citibank

india

The application may require a few tries to get used to the flow of data but it is fairly straight forward and simple to use.
